

Questions and answers submitted by vendor regarding ERP RFI:

1. Could you please describe in more detail your business process of the following ceded reinsurance with tracking of reinsurance contracts and recoveries?

Currently this is tracked using spreadsheets. Tracking of reinsurance contracts is a contract management function and recoveries is equivalent to accounts receivable.

2. Can you explain the type of prebuilt integration you are looking for with Active Directory?

We are exploring what is available. We would like the integration to facilitate authentication and assignment of users and roles.

3. Is there any mobile functionality that CEA is looking for?

We are looking to do approvals, some self service functionality, and also reporting would be helpful. Again, still exploring what's available.
